

CCA: Yesterday, Today and Tomorrow

Tim Carey

Industrial Product Specialist

Lonza Wood Protection

Wood poles are strong, flexible and adaptable. CCA has a long history of improving this already superior pole material. We will review how we go from the tree in the forest to a standing CCA utility pole and how to make sure you get a good quality product that will provide a good service life.

About Tim

Tim Carey has over 42 years of experience in wood poles. Tim is a member of AWWPA T4 Pole Treatment Committee, ANSI 0.5 Wood Pole and Crossarm Committee and Secretary of the Wood Pole Group of CIGRE, an international utility organization. He has over 35 years experience in the inspection of treated wood products including poles at both pole manufacturing locations and ground line inspection, treatment and reinforcement. Tim currently works with producers and users of industrial-treated wood products on proper standard selection and appropriate use based on applications.
